

1. *BSE 500 is a free-float-adjusted, market-cap-weighted index of 500 companies listed on the Bombay Stock Exchange.*
2. *BSE 500 comprises of stocks which are highly liquid (predominantly Large Cap) and broadly covers our investment universe under this investment strategy. Hence, we believe it makes a good benchmark as the portfolio has a bias towards highly liquid stocks. However, the Investment Approach's performance may not be strictly comparable with the performance of the Benchmark, due to inherent differences in the construction of the portfolios, and the volatility of the benchmark over any period may be materially different than that of the composite over the same period.*
3. *Data of other indices is provided for information purposes only and to allow clients to compare the performance of the Investment Approach to that of certain indices (many of which are well known and widely recognized). While we generally believe these comparisons provide meaningful and useful information to investors (for example, as a way of comparing an investment in the Investment Approach to other types of investments that clients/investors might make), inclusion of any particular index is not a representation that the index is an appropriate benchmark for evaluating the Investment Approach's performance. In particular, the volatility of indices over any period may be materially different from that of the Investment Approach over that same period.*
